1. EXECUTIVE SUMMARY

Abramovich Media LLC specializes in **branded fashion and lifestyle cinematography**—capture where texture, silhouette, and environment must read as premium on a large screen, not only on a phone. For Uncover's **high-impact qualitative** study, we propose **owner-operator field documentation** in **Scottsdale only**: **in-home sessions**, **loyalist dinner** coverage, and **aesthetic B-roll** aligned to Rothy's *Customer Aesthetic* initiative.

This proposal maps **your stated deliverables** to our **capture stack**, states a **single fixed investment** for the published schedule, and sets commercial terms for a **W-9 subcontractor (1099)** engagement. Fees reflect what **editor-ready, participant-organized, brand-safe 4K masters** are worth to **Uncover's editorial pipeline and Rothy's-facing quality**—anchored in **outcome certainty**, not a race to the lowest comparable day rate.

2. UNDERSTANDING OF YOUR PROJECT BRIEF

- **Objective:** Understand how affluent, style-conscious women evaluate design and style signals—captured as **professional cinema documentation** for Uncover's editorial team.
- **This engagement: Scottsdale, AZ — April 14–16, 2026** (per your field schedule for this market).
- **Capture types:** In-home ~90-minute deep dives (closets / wardrobes); elegant moderated loyalist dinners; detailed aesthetic B-roll (closets, wardrobes, outfits, shoes, textures).

6. INVESTMENT — SCOTTSDALE PACKAGE (USD)

Named outcome: research-grade **4K masters**, disciplined audio, participant-organized foldering, and **same-day physical handoff** on our drive—for the Scottsdale dates above.

The figure below is **one transparent package**. It is set so we can absorb **verification depth**, **long portal-to-portal days** (buffer for resets and location moves), and **premium-context execution** without cutting corners on data safety or on-set judgment.

	Amount
Scottsdale field capture package (fixed)	**$6,733.12**

What the fee buys: (1) **Single vendor accountability** for camera, light, audio, data, and handoff across homes and dinner. (3) **Brand-sensitive execution**—both Uncover and Rothy's operate at a level where **on-set judgment** and discretion with participants matter as much as camera settings.
